BOARD REVIEW FOR THE YEAR ENDED 30 SEPTEMBER 2023
The financial year 2023 was a barrier-breaking year for Goddard Enterprises Limited as we crossed the $\$ 1$ bn in Revenues and the 25 cents earnings per share marks for the first time in our history. The record-breaking performance is evidence of the transformational work undertaken across the Group in the execution of our strategy which began pre-Covid but was slowed by the negative effects of the pandemic. This has resulted in another successful year for the Group with a net income attributable to equity holders of $\$ 67.9 \mathrm{~m}$ and an earnings per share of 29.7 cents; up $35.0 \%$ on prior year.
Top-line growth from our continuing operations of $12.3 \%$ resulted in Revenues from contracts with customers of $\$ 1.1$ bn and a Profit from Operations before other gains/(losses) -net of $\$ 84.4 \mathrm{~m}$; an increase of $\$ 22.7 \mathrm{~m}$ or $36.7 \%$.
Our Catering and Ground Handling Division delivered a remarkable performance as it marginally surpassed Caribbean Distribution Partners Limited (CDP) to become our top contributor to our earnings per share for the year. During the period, the division continued the implementation of its diversification and growth strategy with the acquisition of International Meals Company Panama, which operates food and beverage concessions in Tocumen International Airport in Panama. The sales from this business along with an increase in airline catering sales during the period resulted in top-line growth for the division of $31.0 \%$ and an increase in its net income by $43.2 \%$.
CDP, our fast-moving consumer goods joint venture (JV) with Agostinis Limited gave another good performance with growth in revenue and net income of
$11.1 \%$ and $8.9 \%$ respectively. The division, the results of which are included within the Share of fincome orssciated compaies was able tend $11.1 \%$ and $8.9 \%$ respectively. The division, the results of which are included within the Share of income of associated companies, was able to endure margin pressures as careful focus on its brands and expense management led to an improved result. During the year, the JV acquired $80 \%$ of Chinook Trading
Canada Limited a Canadian-based consumer product rading company that orates primarily in the Caribbean Canada Limited, a Canadian-based consumer product trading company that operates primarily in the Caribbean.
The Building Supplies Division gave a solid performance to surpass the good result it produced in the prior year. The division was able to overcome some
sales challenges during the year by evaluating and adjusting its pricing strategy to improve its margins while delivering and sales challenges during the year by evaluating and adjusting its pricing strategy to improve its margins while delivering an affordable product for the
customer. customer.
Our Manufacturing Division experienced mixed performances among its mainly Barbadian-based subsidiaries. The division was able to achieve top-line growth of $13.3 \%$. However a significant increase in Finance Costs incurred during the year to fund the syndicated loan facility arranged for plant expansion, resulted in a decline in its net income of 5.7\% below a below-par performance given in the prior year.
The Services Division gave a commendable performance with an increase in Revenues and net income. During Q4, we divested of $\mathrm{M} \& \mathrm{C}$ General Insurance Limited in St. Lucia; the results of which are included in Income from discontinued operations, to RF\&G Insurance Limited in Belize. There was a gain on The Auto $\$ 0.8 \mathrm{~m}$ which is included in other gains/(losses)-net.
The Automotive Division overcame supply challenges experienced in the first half of the year to deliver an improved result above the prior year. Improved margins, even though on lower sales, resulted in an increase in net income for the period. During the year, we launched a range of Nissan X-Trail E-powered

The Shipping Division's performance during the year was disappointing as we experienced delays in the launch of some initiatives. The nationalization of the stevedoring services in Barbados and continued losses in Xpress Freight Services Inc. in Miami negatively impacted the division.
During the year we recovered $\$ 5.7 \mathrm{~m}$ from our investment in Mirexus Biotechnologies Inc which was previously fully written off.
An increase in borrowings to fund acquistions and an increase in interest rates on our USD denominated borrowings resulted in an increase in finance costs. Taxation increased as a result of an increase in profitability, however our effective tax rate was lower as a higher percentage of profits was incurred in low tax jurisdictions.
Of note, there is a cash flow hedge gain of $\$ 10.2 \mathrm{~m}$ included within Other Comprehensive income. This represents the movement of the hedging reserve from he end of the last financial year to the end of the current year. Our cocoa manufacturing entity uses future commodity contracts as well as forward currency contracts to hedge against any exposure to volatiilty in the commodity prices
reserve represents the market value of open positions for forward contracts.
The cash reserves of the Group remain healthy and our interest-bearing debt-to-equity ratio was $31: 69$ at the end of the year. Our net assets value per share was $\$ 3.10$. We are excited about the future of the Company as we have demonstrated our resilience in overcoming the challenges of the recent past to deliver on our strategy. We are mindful of the tumultuous global environment in which we operate, however, with a clear focus on our core we are optimistic about continued success.
The Board would like to take the opportunity to thank all stakeholders for their support during the year
A third interim dividend of 2.0 cents has been declared and will be paid at the end of February 2024.
